

# Course organization

One learns to walk from walking, language through speaking, therefore training in groups. And time is money.

- Take a little time for yourself to indulge in a few arguments which will save you money in the long run.
- We do not have a catalogue from which one can learn choose to learn particular language at a time that suits them, much like selecting furniture in a home depot store. **Our work is similar to that of a craftsman in that we assess your needs and then present you with a proposal which fits in to your time table.**
- **Our hourly rates are not fixed.**  
Think about what you want for your money. Naturally taking part in a group of 10 to 20 people is cheaper than partaking in smaller groups. However, if you are not happy with your communication skills after a number of months, within such a large group, you will probably start to think that you have been wasting your time.

**Small group courses (4-6 Participants)**

**Language training in groups of 5 to 6 people is available from 98 Euros per month.**

Please inquire at our Language Studio about the start and the prices for our courses as well as all additional information. We are at your disposal and are looking forward to hearing from you.
